- Wood Shops
- Mail Rooms
- Body Shops
- Copy Rooms
- Veterinary Clinics
- Machine Shops
- Print Shops
- Many More

The Dust Free[®] Work Shop Air Cleaners are designed with flexibility in mind, making it easy to utilize them in many different applications.

The units employ high velocity blowers that are capable of cleaning the air in large rooms and spaces. Pre-filters and V-Bag main filters are used to ensure that air is cleaned to OSHA standards.

Each unit is constructed of high quality, 20-gauge, rustproof, galvanized steel to provide long lasting durability. And each unit is backed up by a 5-year limited warranty.

GENERAL DESCRIPTION FILTRATION

The Dust Free[®] work shop air cleaner systems are designed to capture particles from the air under extreme conditions. All systems employ a dual-stage filtration method using a pre-filter and a V-Bag main filter.

The air cleaners can be hung from a ceiling or set on a table or saw horses. This flexibility allows them to be placed near the source of the contamination.

The units are constructed of 20-gauge galvanized steel and are durable enough to withstand the rigors of any work shop.

DISPOSABLE PRE-FILTER(STANDARD)

Disposable 50% arrestance filter, includes frame. Removes large particles and extends the life of the main filter.

ELECTROSTATIC PRE-FILTER(OPTIONAL)

Permanent, washable 95% arrestance filter. Removes large particles and extends the life of the main filter.

65% MAIN FILTER(STANDARD)

6-Pocket, V-Bag filter, 65% ASHRAE.

95% MAIN FILTER(OPTIONAL)

6-Pocket, V-Bag filter, 95% ASHRAE.
