

CLEAN AIR STRATEGY.

The air in our home may contain millions of particulates. Most of which are so small they are impossible to see. It takes a product, or several products, that can offer filtration, purification, and UV inactivation to provide great air quality.

THE DUST FREE® ACTIVE AIR PURIFIER SUPPORTS ALL THREE LEVELS OF THE CLEAN AIR STRATEGY.

**START BREATHING
CLEANER AIR
TODAY!**

* FILTRATION

Reduce dust, pollen, mold, and dander. The DF Active improves the performance of existing filtration systems.

⚗ PURIFICATION

Air purification using next generation technologies to reduce indoor air pollutants.

☀ UV INACTIVATION

When professionally installed, UV-C light can dose the internal HVAC system where the light shines.

DID YOU KNOW?

90%

Of our time is spent indoors.

**The only air you can control
is in your home!**

ZERO OZONE EMISSIONS - MEASURED OZONE EMISSIONS FROM DF ACTIVE 6" AND DF ACTIVE 12" DURING USE PHASE DOES NOT EXCEED 0.005 PPM AS TESTED BY UL 867. UL.COM/ECV

EPA Establishment No. 73316-TX-1

Dust Free® uses independent labs and universities for product testing. Visit <http://www.dustfree.com/testing>.

The product and technologies described are not medical devices, and are not intended to diagnose, treat, cure, or prevent any disease or illness.

Available in 6" and 12" models.

ACTIVE
INDOOR AIR PURIFICATION

WHY CLEAN AIR IN YOUR HOME IS IMPORTANT.

Our lives are not static. Neither is the air quality in our homes. It is always changing. Some hours, days, weeks, and months, our air is worse than others. Whether caused by cold or flu, cooking, cleaning, or a remodel project, at some point, **exposure to bad air could affect every occupant of our home.**

ACTIVE INDOOR AIR PURIFICATION

UV-C LIGHT AND IONIZATION
PROVIDE A COMPREHENSIVE IAQ
SOLUTION.

DUST FREE® ACTIVE TEST RESULTS

The Dust Free® Active 12" was tested and proven effective in the reduction of MS-2 bacteriophage.

MS-2 bacteriophage is a positive-sense single-stranded RNA virus that is often used as a substitute for noroviruses in studies of disease transmission.

POLLUTION LEVELS

A 2018 American Lung Association study says that 141.1 million Americans live in areas with high levels of particulate in the air. Meaning that 2 out of every 5 Americans are breathing polluted air.

But the study focuses on outdoor air and particulate levels only. The study does not include indoor pollutants which regularly infiltrate our homes.

40%

of Americans are breathing polluted air.

Meets UL 2998 no ozone standards and is CARB certified.
