Dust Free Announces UL 2998 Listing for all Duct Mounted Air Purification Products

Royse City, TX— 11/05/2021 — Dust Free is pleased to announce that all Duct Mounted Air Purifiers manufactured at their Royse City, Texas facility have been tested to the UL 867 standard by Underwriters Laboratory and has been listed to UL 867 and UL 2998. UL 2998 is Underwriter Laboratory's non-ozone standard for electronic air purifiers. This listing includes Air Knight IPG, Air Knight PX5, Dust Free Active, and Dust Free Carbon.

Dust Free® is a family-owned and operated business headquartered in Royse City, TX, just 40 miles east of downtown Dallas. Dust Free® was established in July of 1982 as a manufacturing company specializing in air filtration equipment designed to benefit allergy patients who needed a clean indoor environment.

Today, Dust Free® manufactures a wide variety of air purification equipment designed to help allergy patients in residential and business locations. The company also provides indoor air quality training for its distributors. It has a very active research and development program designed to meet the indoor air quality needs of the future.
