

Unfortunately, as wildfires become more normal in our daily lives, we are forced to deal with poor air quality outdoors as well as indoors.

Get relief from poor indoor air quality caused by wildfires.

Did you know that poor outdoor air quality can cause the air inside your home to be unhealthy to breathe?

Dust Free® has been making products for more than 40 years that help make the air inside your home easier to breathe. Learn more at <https://dustfree.com>

# Dust Free<sup>®</sup> has solutions to protect the air in your home.

Smoke infiltration from wildfires is a major concern for the indoor air quality of our homes. Dust Free<sup>®</sup> technologies can help reduce exposure to smoke, as well as other elements that may make breathing the indoor air in your home uncomfortable, such as allergens, volatile organic compounds, and more.

## Basic Breather

A starter package to address smoke infiltration and airborne particulate concerns.

Active

### Includes:

- Dust Free<sup>®</sup> Active Air Purifier.
- Helps reduce airborne particles like smoke.
- Makes airborne particles easier to capture by your filtration system.
- Active technology uses UV light energy to reduce other common indoor air quality issues.
- Ozone free. Meets and surpasses UL 2998 no ozone standards. CARB certified.

## Clear The Air

This package offers more indoor air protection with the addition of bypass HEPA technology.

Active

Bypass HEPA /  
Bypass HEPA Plus

### Includes Basic Breather features, plus:

- Dust Free<sup>®</sup> Bypass HEPA or Dust Free Bypass HEPA Plus.
- HEPA filtration is efficient down to 0.3 microns and is the only filtration technology that works to filter out smoke particles at a high level.
- Each model includes pre-filter with carbon media and HEPA filtration. The Dust Free Bypass HEPA Plus also includes germicidal UV and photocatalytic technology.

## Batten Down The Hatches

The ultimate smoke infiltration package, offering active air purification, bypass HEPA technology, and high efficiency media air cleaner.

Active

Bypass HEPA /  
Bypass HEPA Plus

Media Air  
Cleaner

### Includes Clear The Air features, plus:

- Dust Free<sup>®</sup> MERV 13 High Efficiency Media Air Cleaner.
- MERV 13 filter technology captures a significant amount of airborne particles, including sub-micron particles.
- 100X more effective than traditional fiberglass filters.
