

AIR FILTERS

EnviroGreen 8 Pleat

The high efficiency filtration of the throw-a-way type pleated filter, with the environmental consciousness of a permanent, washable type air filter.

The First MERV 8 Reusable Pleated Filter

Pleated filters are a smart way to effectively clean the air in your home. However, over time the disposable nature of the filters requires space in landfills and tree pulp for the cardboard frames. Millions of pleated filters are thrown away each year, and thousands of trees are cut down to produce the cardboard that comprises the outer frame of disposable filters. Until now, there was not a choice for the consumer in purchasing industry recognized Minimum Efficiency Reporting Value (MERV) tested air filters that were not disposable.

100% Recyclable.

Reusable, washable pleated filter means you will not need to throw another filter into your local land fill for 5 years.

Pleated Media.

Proprietary asymmetrical "V-Clean" filter core technology is made from completely recyclable materials.

Easy To Maintain.

"No tools required" frame design allows for quick removal of the proprietary V-Clean filter core for deep cleaning

Lifetime Frame.

Anodized aluminum frame is guaranteed for life.

33 Filter Sizes.

Custom sizes up to 600 square inches.
